

AMBE GROUP OF SCHOOLS - Vadodara

Harni, Karelibaug, Waghodia Road & Manjalpur

Quality Education for Masses

"Learning Today... Leaders Tomorrow"

Managed by B.G. Education & Aum Education Trust

PRIMARY TO HIGHER SECONDARY SECTION

Ambe (Estd. 1991) is a leading educational group of Vadodara with 21,000 students in 28 years studying across the city with the help of 817 teaching & non-teaching staffs, spreading over 2.60 lakhs sq. ft. land with 4.28 lakhs sq. ft. of construction area.

There are 420 classes accommodated in 491 class rooms. The group believes in quality education. Every year students excel in board examinations, at district & state level.

A dynamic, versatile personality, possessing in-depth knowledge, foresight and time tested managerial powers to develop & administer educational institutes successfully. His motto being "Quality Education for Masses" has made him reach the common man.

Suryakant Shah

Founder & Chairman

Amit Shah

Director - Ambe Group of Schools

Mital Shah

Directress - Ambe Group of Schools

Flag bearers, young, energetic and enthusiast directors looking into micro level of school operations of the respective school units in co-ordination and implementing group school policies in tandem under the guidance of school chairman. Motto : To keep the name of the education institute to the highest level.

Vision

To groom and nurture dynamic and caring citizens of tomorrow to meet the challenges of a global society while retaining their moral and traditional values.

Belief

Ambe Parivar, firmly believes in these very words of Swami Vivekananda, " Knowledge exists in every human being and education is the process through which realization of that knowledge takes place."

Mission

To impart holistic education in our temple of knowledge by extending freedom to all students equally, thereby grooming the students to accept global challenges and grow up into responsible future citizens.

www.ambevidyalaya.org

A comprehensive and balanced curriculum is planned, focusing on the development of talents and skills which would help the students in becoming productive citizens, future leaders and lifelong learners.

Each student possesses a unique combination of multiple intelligences. Our integrated teaching methodology nurtures a stimulating learning environment to encourage students to learn at higher levels. Instructional strategies are student centered and include inquiry, active learning, experience-based learning, cooperative and participative learning activities. We focus on integration of knowledge, development of critical thinking, problem solving, performance skills and value based education.

Classroom teaching involves discussion, lively interaction with the students, PPT's, worksheets and smart class programs with notes, flowcharts and drawings. Simulated models and role plays give students an insight into real life situation. Projects are prepared by students for a deeper insight into various topics.

By adopting a student centered approach, we motivate students to develop higher order thinking skills. In classroom technologies – computers, audio visual tools, web based tools enhance technological skills in a child. An IT enabled resource centre provides support to keep pace with the dynamic nature of learning and pedagogy in education.

We have science labs which provide an opportunity to ascertain the principles of science through hand on activities. A questioning scientific temperament is nurtured in each child.

We have well stocked library with latest books, periodicals, news papers, journals for reading and references.

***“Teach me, and I will forget.
Show me, and I might remember.
Involve me, and I will never forget.”***

The theoretical knowledge is enhanced when a co-curricular activity related to the content taught is organized. Intellectual development of their personality is achieved to a great extent in the classroom itself, but holistic development like character building, spiritual & moral values, physical growth, creativity and many more are backed up by co-curricular activities. It professes coordination, adjustment and speech fluency.

Celebrating special days encourage students to embrace other tradition & culture. National, International days & Ambe days evoke interest, concern, curiosity & creativity in the child. We celebrate festivals irrespective of religion, creating a strong bond of humanity.

Sports are not about competition. It is about having fun, being physically active, building coordination and team work. Students get an opportunity to display their self-confidence, patience, zeal and sportsmanship. Regular drill, fun games, yoga, basketball, volleyball, skating and many

indoor and outdoor games are organized.

Art studio, music room and the school auditorium is perpetually abuzz with a plethora of activities ranging from workshops, drama, dance, yoga, projects, debates, discussions, competitions, social, environmental and health awareness programs.

Keeping the values intact, we wish to offer the right kind of educational system which is based on moral ethics. We allow our children to bloom, blossom & thrive, giving them the right platform for all round development.

Grooming Skills For A Challenging Tomorrow

Cognitive Skills

With the development of these skills, children become more aware of the external events. They use logic to solve the problems, develop better control over attention and are able to use their cognitive abilities to attain their goals. Logic and reasoning also develops further as children start making connections between the ideas. Auditory processing, an important skill which is a foundation for reading and listening skill is also developed at this stage.

Logical and analytical reasoning test, GK test, outside exam, different activities and competitions, field trip, puzzle solving activity, word building competition, audio-visual test etc., help in developing this skill and are planned to encourage child's cognitive development in the areas of memory, concentration, attention and perception.

Creative Thinking

Each child has inborn creativity. All we need to do is to give encouragement and opportunities. Stimulating environment is provided by the school where children can discover their talents such as dancing, drama, art and craft, sculptures, music. Activities like poetry recitation, story writing, doha-chhand-chopai-haiku, slogan writing, diary writing and report writing develop **Creative Thinking Skills**.

Language & Communication

Listening, speaking, reading, writing, gestures, facial expressions, eye contact etc. are the skills we need to develop for a complete communication. Word games, storytelling, story weaving, riddles help to explore language and communication skills with fun along with building the student's confidence. Our students learn to express scientific principles and abstract concepts.

Life Skills (Social, Emotional & Thinking)

Life skills are abilities for adaptive and positive behaviour that enable individual to deal effectively with the demands and challenges of everyday life. They are abilities that facilitate the physical, mental and emotional wellbeing of an individual. It fosters the ability to understand the feeling of others, control his/her own feeling and behaviour and to get along with peers.

It helps the child to be successful in living productive life. Learning and practicing life skill builds strong positive relationship which improves their personal and social qualities such as self esteem, compassion, respect, confidence, trust, empathy, and sense of right and wrong. We conduct projects in a group, group discussion, street plays, group dance, group singing competitions and drawing competitions wherein they can express their feelings and develop the spirit of cooperation and communicate respectfully with the people around them. Elocution, debate, extempore competition make them good listeners, develop their ability to respond and learn to communicate own thoughts to other groups.

Stress Management & Self Management

Challenging classes, exams, responsibilities, strict schedules and poor time management triggers stress in students. Stress relieving techniques, healthy life style, and positive attitude help reduce stress. Inspirational talks by experts, physical exercise, breathing exercise, yoga and music help our students to function at their best. Sports competitions are held throughout the year that refreshes the body and mind, reduces pressure and stress among students. Activities like best out of waste, rangoli making, cooking without fire, salad decoration etc. are planned to develop their creativity. Celebration of festivals plays a vital role, it also helps to reduce stress and make our students happy and healthier. Professional counselor in our schools also help our students in dealing with the problems related to stress.

Leadership

Learning Leadership Skills right from young age, provide children with an excellent head start in life. It is extremely valuable and necessary to learn different leadership techniques to develop confidence and overall mental well being, even though children do not possess personality that is not automatically predisposed to lead others.

Election and investiture are conducted with the help of high degree of earnestness and passion. Events managed by the students themselves like - organising assembly, boost up students' self confidence, maintaining school's discipline, making arrangements for different co-curricular activities, develop leadership and organising skills in them.

HARNI & KARELIBAUG UNITS

Managed by B.G. Education Trust
